About Us

The Cremation Gardens at Rocky Mountain Memorial Park

started with a vision to create a memorial park to resemble Colorado; native plants, flowers and a lot of personality – just like those we love.

Soon we will begin with Phase II of these amazing Cremation Gardens. Included in the expansion will be several family estate sections, and some artistically designed columbarium niches. As always from the property there will be breath-taking views of the Colorado Rocky Mountains. Feel free to speak with us about projected dates for completion and pre-construction purchases.
Mount Evans Pathway

Columbarium Niches

For those choosing above-ground interment, we offer these attractive niches. Placed toward the entry area of the Cremation Gardens, these niches are convenient for those who wish to visit frequently. With bronze fronts, they are available for either single or companion interments.

Mount Evans Pathway

Reflections Monument

This is a more contemporary memorial using several elements; glass, granite and bronze. It is suitable for either single or companion interments. The interment takes place within the cored granite section of the memorial. The three elements provide ample space for names, dates and a meaningful phrase, verse or scripture.

Upright Monuments

These cored upright monuments are designed for companion interments. They boast spectacular views of Mount Evans.

These sandstone memorials are designed for companion memorialization and are located near flower beds and water features.
These are companion memorials for those who wish to have their cremated remains buried in the earth.
Scattering Ossuary

The ossuary is for communal scattering of cremated remains. Memorialization options are separate.
